

ANKIT KUMAR MISHRA

Software Engineer — QA Automation | DevOps | Cloud

ankitkumarmishra5155@gmail.com · github.com/ankitkumarmishra · linkedin.com/in/ankitkumarmishra · India (IST)

Computer Science engineer specialising in software quality assurance, DevOps and full stack development. I automate quality, streamline delivery pipelines and help applications move reliably from development to production.

EXPERIENCE

Conqudel Pte. Ltd.

June 2026 – Present

Associate Software Engineer — QA & DevOps

- Automated web testing with Python and Selenium across core user journeys.
- Validated REST endpoints, payloads and error paths using Postman collections.
- Supported Jenkins CI/CD pipelines, including build failure triage.
- Containerised applications with Docker and supported Kubernetes deployment workflows.
- Worked with AWS and Microsoft Azure cloud infrastructure across environments.
- Executed functional, regression and smoke testing for every release.
- Tracked defects in Jira and collaborated inside an Agile/Scrum team.
- Documented test cases and deployment steps for repeatable handover.
- Maintained regression suites so shipped behaviour stays verified release over release.

PySpiders Software Testing & Development Center

April 2026 – June 2026

Python with Data Science Intern

- Exploratory data analysis with Python, Pandas and NumPy on structured datasets.
- SQL for extraction, joins and validation of source data.
- Data visualisation with Matplotlib and Power BI dashboards.

KEY PROJECT

TestPulse — Python QA Automation & CI/CD Testing Framework (UI + API)

- 12 Playwright UI scenarios and 6 REST API tests orchestrated with Pytest.
- Page Object Model, shared fixtures and automatic screenshot capture on failure.
- pytest-html reporting, GitHub Actions CI on push and pull request, Dockerised execution.
- REST schema validation and environment configuration handled through python-dotenv.

TECHNICAL SKILLS

QA Automation	Python, Selenium, Playwright, Pytest
API & Quality	Postman, REST API testing, Functional, Regression, Smoke, STLC
DevOps	Jenkins, GitHub Actions, CI/CD
Containers	Docker, Kubernetes
Cloud	AWS, Microsoft Azure
Data	SQL, NumPy, Pandas, Matplotlib
Tools	Git, GitHub, VS Code, Jira, Agile/Scrum

EDUCATION & CERTIFICATION

B.Tech, Computer Science and Engineering — RTC Institute of Technology

2022 – 2026

Google Cloud Arcade Program — Champion Tier

Highest recognition tier in the program, earned through hands-on Google Cloud labs and Arcade challenges rather than multiple-choice assessments.
